

# 30 years of GPPL

Serving customers since 1995 Globally

## Our Journey

### 1995

Established in 1995 with a vision to achieve excellence, GPPL began modestly with 20 employees and a small facility, crafting quality roofing sheets, moulded components, and storage tanks- driven by determination and purpose.

### 2004

Within a decade, GPPL evolved into a symbol of innovation and progress — expanding its facility to 6,000 sq. yards, strengthening its workforce, and introducing advanced solutions like fume exhaust and chemical handling systems. Every milestone brought us closer to redefining industry standards.

## From Vision to Victory - 30 years strong!

From humble beginnings to global recognition, our 30-year journey stands as a testament to quality, integrity, and teamwork.

With gratitude and pride, I thank every hand and heart that has shaped GPPL's 30 years of excellence.

- CV Singh, Founder

# 2016

By 2016, GPPL had expanded beyond India's borders, earning global recognition. Guided by our founder's vision for a sustainable future, we introduced Effluent and Sewage Treatment Plants, reinforcing our commitment to environmental responsibility and technological excellence.

# 2025

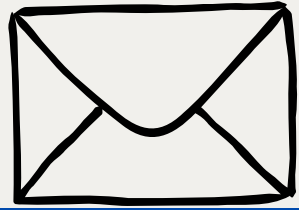

In 2025, GPPL stands as a powerhouse of innovation and excellence — a trusted global name with over 200 skilled professionals and a hundredfold growth in turnover since inception. Continuing our journey of progress, we have expanded our product portfolio to include moulded gratings, pultruded sections, decking sheets, and cable trays, further strengthening our presence in the composites industry.

To support this expansion, we have enhanced our infrastructure with cutting-edge Ritmo polyfusion butt welding machinery and advanced pultrusion machinery of 20-ton and 25-ton capacity, adding to our existing 10- and 15-ton setups, along with 5 machines in our moulded gratings division. These advancements reflect our commitment to precision, performance, and sustainability.

Guided by the vision of our Founder & CEO, Mr. C.V. Singh, and propelled by the passion of the next generation, GPPL continues to move forward — setting new benchmarks, embracing innovation, and shaping the future of acid handling and composite solutions worldwide.
